Compact Oxford English Dictionary 1

Appendix: Effective English 1

Note on trademarks and proprietary status

This dictionary includes some words which have, or are asserted to have, proprietary status as trademarks or otherwise. Their inclusion does not imply that they have acquired for legal purposes a non-proprietary or general significance, nor any other judgement concerning their legal status. In cases where the editorial staff have some evidence that a word has proprietary status this is indicated in the entry for that word by the label trademark, but no judgement concerning the legal status of such words is made or implied thereby.

Preface

Preface to the third edition

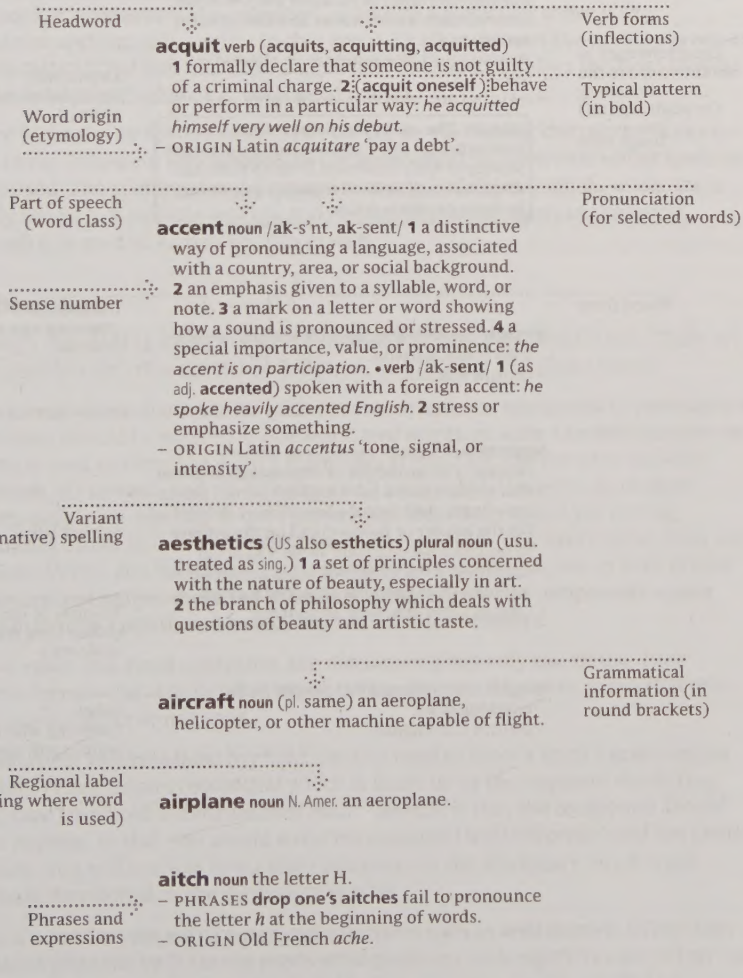
This new edition of the *Compact Oxford English Dictionary of Current English* is a fully revised, updated, and redesigned edition of the *Compact Oxford English Dictionary* (2nd edition). It aims to provide up-to-date and accessible information on the vocabulary of contemporary English in a conveniently sized volume, together with sound practical advice on writing good English in everyday situations.

Based on the *Concise Oxford English Dictionary* (11th edition), the *Compact Oxford English Dictionary* is directly informed by the evidence of how the language is actually used today, drawing on the analysis of hundreds of millions of words of real English contained in the Oxford English Corpus. This information is presented in a clear, concise, and accessible way; definitions focus on the typical meanings of words and are written so as to enable the user to understand the meaning of a word quickly and easily, without having to look up technical terms elsewhere in the dictionary. The new design and the open layout, with each new section of an entry (phrases, derivatives, usage notes, and etymologies) on a new line, ensures that finding individual sections, senses, and entries is easy to do.

The dictionary covers a broad range of vocabulary: while the focus is on the core language of contemporary English, there is also a wide selection of technical terms from specialist areas such as medicine, computing, and biology (for example, *endorphin*, *megapixel*, and *echinacea*). For the new edition, there are thousands more example sentences showing how words are really used; there is also much more help with pronunciation, grammar, and usage. A brand-new *Effective English* section is to be found at the end of the dictionary, which offers the user practical help on achieving good English in everyday situations such as writing CVs, letters of complaint, and business reports, together with a section on different levels of language and a list of commonly confused words.

Pronunciations are given using a new simplified respelling system, making them very easy to understand. Etymologies have also been clarified and simplified; they are written in a non-technical style to highlight the main words from which English words originate.

The editor would like to thank Sheila Ferguson for her contribution to the *Effective English* section and the New Words team of the *Oxford English Dictionary* for their help in identifying and drafting new words.



Preface to the revised edition

This revised edition contains hundreds of extra entries for words and meanings that have entered the English language since the third edition of the dictionary was published in 2005. The *Effective English* section has also been revised and supplemented with new material.

Guide to the use of the dictionary

1. Structure of entries

The *Compact Oxford English Dictionary* is designed to be as straightforward and easy to use as possible. Here is an explanation of the main types of information in the dictionary.

Homonym number (shows different word with the same spelling)

alight[1] verb **1** (**alight on**) (of a bird) land or settle on something. **2** formal get off a train or bus. **3** (**alight on**) happen to notice something.
– ORIGIN Old English.

alight[2] adverb & adjective **1** on fire. **2** shining brightly.

alternate verb /**awl**-ter-nayt/ **1** occur or do in turn repeatedly: *the narrative alternates personal observation with historical fact.* **2** change repeatedly between two contrasting states: *his mood alternated between aggression and morose despair.* • **adjective** /awl-**ter**-nuht/ **1** every other: *the service runs on alternate days.* **2** (of two things) each following and succeeded by the other in a regular pattern: *put alternate layers of potatoes and fish in the casserole dish.* **3** chiefly N. Amer. another term for **ALTERNATIVE**.

Cross reference to another word in the dictionary (in small capitals)

– DERIVATIVES **alternately** adverb **alternation** noun.

Derivatives (in alphabetical order)

– ORIGIN Latin *alternare* 'do by turns'.

Usage note

USAGE: The use of **alternate** to mean **alternative** (as in *we will need to find alternate sources of fuel*) is common in North American English, though it is still regarded as incorrect by many people in Britain.

Plural form

amigo /uh-**mee**-goh/ **noun** (pl. **amigos**) informal, chiefly N. Amer. a friend.
– ORIGIN Spanish.

Usage label (showing how word is used)

appeal verb **1** make a serious or earnest request. **2** be attractive or interesting: *activities that appeal to all.* **3** ask a higher court of law to reverse the decision of a lower court. **4** Cricket (of the bowler or fielders) call on the umpire to declare a batsman out. • **noun 1** an act of appealing. **2** the quality of being attractive or interesting: *the popular appeal of football.*

Subject label

Example of use (taken from real evidence)

– ORIGIN Latin *appellare* 'to address'.

aught /awt/ (also **ought**) **pronoun** old use anything at all.
– ORIGIN Old English.

Label (showing whether word is still used)

2. Spelling and forms of nouns and verbs

The *Compact Oxford English Dictionary* gives a great deal of advice and information on spelling, in particular for those words which do not follow regular patterns or which otherwise cause difficulty for native English speakers. The main categories are given below, and you will also find extra information on matters such as using hyphens in the *Effective English* section in the centre of the dictionary.

Alternative spellings

The main form of each word given in the dictionary is the accepted British spelling. Although there is only one way that most words can be spelled, sometimes other spellings (called *variants*) are also acceptable. Such spellings are given after the headword, e.g. **adaptor** (also **adapter**), or before a particular sense if the alternative spelling only applies to that sense. In all such cases the spelling given as the headword is the one that most people use. The label US shows spellings that are used in American English, e.g. **colour** (US **color**).

Where verbs can be spelled with either an **-ize** or **-ise** ending, the two spellings are given in the following way: **apologize** (or **apologise**), to show that either spelling can be used. The spelling **-ise** is far more common in British English, while **-ize** is usually found in American writing and in English in other parts of the world, although it is used in British English as well.

Hyphenation

Although standard spelling in English is fixed, the use of hyphens is not. There are a few general rules that should be followed, and these are outlined below.

Noun compounds: there are no set rules as to whether a compound (a word such as **airstream**) should be written as one word, two words, or with a hyphen (unless the hyphen is used to show the word's grammatical function: see the next section): **airstream**, **air stream**, and **air-stream** are all acceptable. However, in modern English, people are tending to use hyphens less than before, and are writing compounds either as one word (**airstream**) or two words (**air raid**) rather than with a hyphen. While you will find one-word and two-word compounds in both British and American English, there is a general preference to write compounds as two words in British English and as one word in American English.

To save space and avoid confusion, the dictionary gives only one of the three possible forms—the standard British one. This does not, however, mean that other forms are incorrect or not used.

Grammatical information: hyphens are also used to show a word's grammatical function. When a noun compound which is made up of two separate words (e.g. **credit card**) is placed before another noun, the rule is that the compound should have a hyphen, so that you would write for example *I used my credit card* but *credit-card debt*. You will see this in example sentences in the dictionary but it is not otherwise mentioned in the dictionary entries.

There is a similar rule with compound adjectives such as **well known**. When they are placed after the verb (in the *predicative* position) such adjectives are not written with a hyphen, but when they are placed before the noun (in the *attributive* position) they should have a hyphen: *he is well known* but *a well-known painter*.

The rule with verb compounds is that, where a noun compound is two words (e.g. **hero worship**) you should normally write any verb compound formed from it with a hyphen (to **hero-worship**). Compound verbs of this type are always shown in the dictionary entries.

Forms of nouns and verbs (inflections)

Plurals of nouns

The plurals of most nouns are formed by adding *-s*, or *-es* when they end in *-s*, *-x*, *-z*, *-sh*, or *-ch* (as in *church*). These kinds of plurals are not shown in the dictionary.

All other plural forms are spelled out in full, for example:

- nouns ending in *-i* or *-o*, e.g. **alibi** → **alibis**, **albino** → **albinos**
- nouns ending in *-a*, *-um*, or *-us* which are or appear to be Latin forms, e.g. **spectrum** → **spectra**, **larva** → **larvae**
- nouns ending in *-y*, e.g. **fly** → **flies**
- nouns with more than one plural, e.g. **storey** → **storeys** or **stories**
- nouns with plural forms that change markedly from the singular form, e.g. **foot** → **feet**

Verbs

Most verbs change their form (inflect) by adding *-s*, *-ing*, and *-ed* to the infinitive (the basic unchanged part of the verb): **jump** → **jumps**, **jumping**, **jumped**). These kinds of verb forms are not shown in the dictionary.

Other verbs change their forms in the ways set out below and are shown in full:

- verbs which change by doubling a consonant, e.g. **bat** → **bats**, **batting**, **batted**
- verbs ending in *-y* which change the *-y* to *-i*, e.g. **try** → **tries**, **trying**, **tried**
- verbs in which the past tense and/or the past participle do not follow the regular *-ed* pattern, e.g. **feel** → **feels**, **feeling**, **felt**; **wake** → **wakes**, **waking**, **woke**; past part. **woken**

Adjectives

Adjectives have three different forms that express the level or intensity of a particular quality. The basic level is called the *positive*, e.g. **sweet**; the level expressing more of a quality is called the *comparative*, e.g. **sweeter**; and the level expressing most of a quality is called the *superlative*, e.g. **sweetest**. Most adjectives form their comparatives and superlatives in the following ways, and these are not shown in the dictionary:

- words of one syllable adding *-er* and *-est*, e.g. **great** → **greater**, **greatest**
- words of one syllable ending in silent (unspoken) *-e*, which drop the *-e* and add *-er* and *-est*, e.g. **brave** → **braver**, **bravest**
- words which form the comparative and superlative by adding 'more' and 'most'

In all other cases the forms are shown in the dictionary:

- adjectives which form the comparative and superlative by doubling a final consonant, e.g. **hot** → **hotter**, **hottest**
- two-syllable adjectives which form the comparative and superlative with *-er* and *-est*, e.g. **happy** → **happier**, **happiest**

3. Labels

The majority of the words and senses in this dictionary are all part of standard English, which means that they are the kinds of words we use in every type of situation, whether at home, with friends, or in a formal work situation. Some words, however, are suitable only for certain situations or are found only in certain types of writing, and where this is the case a label (or a combination of labels) is used.

Register labels

Register labels refer to the particular level of use in the language—indicating whether a term is informal, formal, historical, and so on.

- **formal:** normally used only in writing, such as in official documents (e.g. **abode**)
- **informal:** normally used only in speaking or writing to friends (e.g. **telly**)
- **dated:** no longer used by most English speakers, but still used by older people or to give a humorous or other effect (e.g. **charwoman**)
- **old use:** old-fashioned language, not in ordinary use today, though sometimes used to give an old-fashioned or humorous effect and also found in the literature of the past (e.g. **damsel**)
- **historical:** only used today to refer to something that is no longer part of modern life (e.g. **blunderbuss**)
- **literary:** found only or mainly in literature (e.g. **foe**)
- **technical:** normally used only in technical language, though not restricted to a particular subject field (e.g. **dorsal**)
- **humorous:** used to sound funny or playful (e.g. **lurgy**)
- **euphemistic:** used instead of a more direct or rude term (e.g. **powder room** instead of 'women's toilet')
- **dialect:** only used in certain local regions of the English-speaking world (e.g. **bide**)
- **derogatory:** deliberately intended to express a low opinion or insult someone else (e.g. **bimbo**)
- **offensive:** likely to cause offence, especially racial offence, whether the person using it means to or not
- **vulgar slang:** very informal language, usually relating to sexual activity or bodily functions, which most people regard as taboo and may cause offence

Geographical labels

English is spoken throughout the world, and, while most of the words used in British English will be the same as those used in American or Australian English, there are some words which are only found in one type of English. For example, the normal word in American English for a pavement is **sidewalk**. These kinds of words are given a geographical label.

The main regional types of English are British, US and Canadian, Australian and New Zealand, South African, Indian, and West Indian. Most of the words and senses in the dictionary are found in all these types of English, but where important local differences exist these are shown. The geographical label Brit. means that the word is found typically in British English but is not found in American English, though it may be found in other varieties such as Australian English. The label US, on the other hand, means that the word is typically US and is not standard in British English, though it may be found elsewhere.

Subject labels

These are used to show that a word or sense is associated with a particular subject field or specialist activity, such as Music, Chemistry, or Football.

4. Pronunciations

The *Compact Oxford English Dictionary* uses a respelling system for pronunciations which is very easy to understand and to use. The dictionary gives a pronunciation for any word native English speakers might find difficult; it does not provide pronunciations for everyday words that are familiar to everyone, such as *table* or *large*. Foreign pronunciations are always shown in the way an English speaker would say them, e.g. /kor-don **bler**/ (cordon bleu).

Pronunciations are divided into syllables by means of hyphens. The main stress is shown in thick dark type, e.g. /**ab**-duh-muhn/ (abdomen).

An apostrophe has been used instead of the sound /uh/ in cases where there is a slight break between sounds, or where the sound is a consonant that is a whole syllable, as in /**foh**-k'l/ (focal) or /**har**-k'n/ (hearken).

The sound of the word 'eye' is shown in two ways: it is shown as /I/ in the first parts of words and in parts where it stands alone, as in /I-*th*er/ (either) or /**kat**-I-uhn/ (cation), but as /y/ in all other cases, as in /**a**-li-by/ (alibi).

A rhyming pronunciation is given where the alternative respelling would involve odd-looking word groups, as in **aisle** */rhymes with* mile/.

List of respelling symbols

Vowels	Examples
a	as in **cat**
ah	as in **calm**
air	as in **hair**
ar	as in **bar**
aw	as in **law**
ay	as in **say**
e	as in **bed**
ee	as in **meet**
eer	as in **beer**
er	as in **her**
ew	as in **few**
i	as in **pin**
I	as in **eye**
o	as in **top**
oh	as in **most**

Vowels	Examples
oi	as in **join**
oo	as in **soon**
oor	as in **poor**
or	as in **corn**
ow	as in **cow**
oy	as in **boy**
u	as in **cup**
uh	as in the 'a' in **along**
uu	as in **book**
y	as in **cry**
yoo	as in **unit**
yoor	as in **Europe**

Consonants	Examples
b	as in **bat**
ch	as in **chin**
d	as in **day**
f	as in **fat**
g	as in **get**
h	as in **hat**
j	as in **jam**
k	as in **king**
kh	as in **loch**
l	as in **leg**
m	as in **man**
n	as in **not**
ng	as in **sing, finger**
nk	as in **thank**

Consonants	Examples
p	as in **pen**
r	as in **red**
s	as in **sit**
sh	as in **shop**
t	as in **top**
th	as in **thin**
th	as in **this**
v	as in **van**
w	as in **will**
y	as in **yes**
z	as in **zebra**
zh	as in **vision**

5. Abbreviations used in the dictionary

adj.	adjective
Austral.	Australian
fem.	feminine
masc.	masculine
N. Amer.	North American
N. English	Northern English
NZ	New Zealand
part.	participle
pl.	plural
pronunc.	pronunciation
S. African	South African
sing.	singular
usu.	usually
W. Indian	West Indian

Aa

A[1] (also **a**) **noun** (pl. **As** or **A's**) **1** the first letter of the alphabet. **2** indicating the first, best, or most important in a set. **3** Music the sixth note of the scale of C major.
– PHRASES **from A to B** from one place to another. **from A to Z** covering or including the entire range or scope of something.

A[2] **abbreviation 1** ampere(s). **2** (**Å**) angstrom(s). **3** answer.

a[1] (**an** before a vowel sound) **determiner 1** used when mentioning someone or something for the first time; the indefinite article. **2** one single: *a hundred.* **3** per: *typing 60 words a minute.* **4** someone like (the name specified): *you're no better than a Hitler.*
– ORIGIN Old English.

a[2] **abbreviation 1** (in travel timetables) arrives. **2** (used before a date) before. [Latin *ante.*]

a- (often **an-** before a vowel) **prefix** not; without: *atheistic.*
– ORIGIN from Greek.

@ symbol 'at', used: **1** to indicate cost or rate per unit. **2** in Internet addresses between the user's name and the domain name: *john.smith@oup.com.*

A1 adjective informal excellent.

A3 noun a standard European size of paper, 420 × 297 mm.

A4 noun a standard European size of paper, 297 × 210 mm.

A5 noun a standard European size of paper, 210 × 148 mm.

AA abbreviation 1 Alcoholics Anonymous. **2** Automobile Association. **3** anti-aircraft.

aardvark /**ard**-vark/ **noun** an African mammal with a tubular snout and a long tongue, feeding on ants and termites.
– ORIGIN South African Dutch, 'earth pig'.

AB abbreviation 1 able seaman. **2** Alberta.

ab noun (usu. **abs**) informal an abdominal muscle.

aback adverb (in phrase **take someone aback**) shock or surprise someone: *I was taken aback by the question.*
– ORIGIN Old English.

abacus /**ab**-uh-kuhss/ **noun** (pl. **abacuses**) a frame with rows of wires along which beads are slid, used for counting.
– ORIGIN Greek *abax* 'slab, drawing board'.

– DERIVATIVES **abasement** noun.
– ORIGIN Old French *abaissier* 'to lower'.

abashed adjective embarrassed or ashamed.
– ORIGIN from Old French *esbair* 'utterly astound'.

abate /uh-**bayt**/ **verb** (of something bad) become less severe or widespread: *the epidemic showed no sign of abating.*
– DERIVATIVES **abatement** noun.
– ORIGIN Old French *abatre* 'to fell'.

abattoir /**ab**-uh-twar/ **noun** Brit. a slaughterhouse.
– ORIGIN French, from *abattre* 'to fell'.

abbé /a-bay/ **noun** (in France) an abbot or other clergyman.

abbess /**ab**-biss/ **noun** a woman who is the head of an abbey of nuns.

abbey noun (pl. **abbeys**) a building occupied by a community of monks or nuns.
– ORIGIN Old French *abbeie.*

abbot noun a man who is the head of an abbey of monks.
– ORIGIN Greek *abbas* 'father'.

abbreviate /uh-**bree**-vi-ayt/ **verb** shorten a word, phrase, or text.
– ORIGIN Latin *abbreviare*, from *brevis* 'short'.

abbreviation noun a shortened form of a word or phrase.

ABC noun 1 the alphabet. **2** an alphabetical guide to something. **3** the basic facts of a subject.

abdicate /**ab**-di-kayt/ **verb 1** (of a king or queen) give up the throne. **2** fail to fulfil or carry out a duty or responsibility.
– DERIVATIVES **abdication** noun.
– ORIGIN Latin *abdicare.*

abdomen /**ab**-duh-muhn/ **noun 1** the part of the body which contains the stomach, intestines, and reproductive organs. **2** the rear

part of the body of an insect, spider, or crustacean.
– DERIVATIVES **abdominal** /ab-**dom**-in'l/ adjective **abdominally** adverb.
– ORIGIN Latin.

abduct verb take someone away, typically using force to do so.
– DERIVATIVES **abductee** noun **abduction** noun **abductor** noun.
– ORIGIN Latin *abducere*.

abeam adverb at right angles to a ship's or an aircraft's length.

abed adverb old use in bed.

Aberdeen Angus noun a Scottish breed of black beef cattle.

Aberdonian /a-ber-**doh**-ni-uhn/ adjective relating to Aberdeen. • noun a person from Aberdeen.
– ORIGIN Latin *Aberdonia*.

aberrant /uh-**berr**-uhnt/ adjective not normal or acceptable: *his aberrant behaviour.*

aberration /a-buh-**ray**-sh'n/ noun **1** an action, event, or way of behaving that is not normal or acceptable. **2** a temporary failure of judgement or concentration: *a mental aberration.*
– ORIGIN Latin, from *aberrare* 'to stray'.

abet /uh-**bet**/ verb (**abets**, **abetting**, **abetted**) (usu. in phrase **aid and abet**) encourage or assist someone to do something wrong, in particular to commit a crime.
– DERIVATIVES **abetment** noun **abettor** (also **abetter**) noun.
– ORIGIN from Old French *beter* 'hound, urge on'.

abeyance /uh-**bay**-uhnss/ noun (in phrase **in/into abeyance**) temporarily suspended or not in use.
– ORIGIN Old French *abeer* 'aspire after'.

ABH abbreviation Brit. actual bodily harm.

abhor /uhb-**hor**/ verb (**abhors**, **abhorring**, **abhorred**) hate or detest: *he abhorred sexism.*
– ORIGIN from Latin *horrere* 'to shudder'.

abhorrent adjective disgusting or hateful.
– DERIVATIVES **abhorrence** noun.

abide verb **1** (**abide by**) accept or obey a rule or decision. **2** (**cannot abide**) dislike very much: *I can't abide lies.* **3** (of a feeling or memory) last for a long time. **4** old use live in a place.
– ORIGIN Old English, 'wait'.

abiding adjective lasting a long time; enduring: *an abiding love of the countryside.*
– DERIVATIVES **abidingly** adverb.

ability noun (pl. **abilities**) **1** the power or capacity to do something. **2** skill or talent.
– ORIGIN Latin *habilitas*.

abject /**ab**-jekt/ adjective **1** very unpleasant and degrading: *families living in abject poverty.* **2** completely without pride or dignity: *an abject apology.*
– DERIVATIVES **abjectly** adverb.
– ORIGIN Latin *abjectus* 'rejected'.

abjure /uhb-**joor**/ verb formal swear to give up a belief or claim.
– ORIGIN Latin *abjurare*.

ablation /uh-**blay**-sh'n/ noun **1** the surgical removal of body tissue. **2** the loss of solid material such as ice or rock by melting, evaporation, or erosion.
– ORIGIN Latin.

ablative /**ab**-luh-tiv/ adjective Grammar (of a case) indicating an agent, instrument, or source, expressed by 'by', 'with', or 'from' in English.

ablaze adjective burning fiercely.

able adjective (**abler**, **ablest**) **1** having the power, skill, or means to do something. **2** skilful and competent: *a very able public speaker.*
– DERIVATIVES **ably** adverb.
– ORIGIN Latin *habilis* 'handy'.

able-bodied adjective physically fit and healthy.

able seaman noun a rank of sailor in the Royal Navy above ordinary seaman and below leading seaman.

ablutions /uh-**bloo**-shuhnz/ plural noun formal or humorous the process of washing oneself.
– ORIGIN Latin, from *abluere* 'wash away'.

ABM abbreviation anti-ballistic-missile.

abnegation /ab-ni-**gay**-sh'n/ noun formal the giving up of something which is valuable or desired.
– DERIVATIVES **abnegate** verb.
– ORIGIN from Latin *negare* 'deny'.

abnormal adjective differing from what is normal or typical.
– DERIVATIVES **abnormally** adverb.
– ORIGIN Greek *anômalos* 'uneven'.

abnormality noun (pl. **abnormalities**) **1** a feature or event which is not normal: *babies with congenital abnormalities.* **2** the state of being abnormal.

Abo /**ab**-oh/ noun (pl. **Abos**) Austral. informal, offensive an Aboriginal.

aboard adverb & preposition on or into a ship, train, or other vehicle.

abode noun formal or literary a person's house or home.
– ORIGIN from **ABIDE**.

abolish verb officially put an end to a system, law, or practice.
– ORIGIN Latin *abolere* 'destroy'.

abolition noun the official ending of a system, law, or practice: *the abolition of the death penalty.*

abolitionist noun a person who supports the abolition of something, especially capital punishment or (in the past) slavery.
– DERIVATIVES **abolitionism** noun.

A-bomb noun an atom bomb.

abominable adjective **1** very unpleasant and causing disgust: *an abominable crime.* **2** informal very bad; terrible.
– DERIVATIVES **abominably** adverb.
– ORIGIN Latin *abominabilis*.

Abominable Snowman noun the yeti.

abominate /uh-**bom**-i-nayt/ verb formal detest something or someone.

abomination noun **1** a thing that causes disgust or hatred. **2** a feeling of hatred.

aboriginal adjective **1** inhabiting or existing in a land from the earliest times or from before the arrival of colonists. **2** (**Aboriginal**) relating to the Australian Aboriginals. • noun **1** a person who has inhabited a land from the earliest times. **2** (**Aboriginal**) a member of one of the original peoples of Australia.

aborigine /ab-uh-**ri**-ji-nee/ noun an original

inhabitant of a land, especially (**Aborigine**) an Australian Aboriginal.
– ORIGIN from Latin *ab origine* 'from the beginning'.

abort **verb** **1** carry out the abortion of a fetus. **2** (of a pregnant woman or female animal) have a miscarriage. **3** bring to a premature end because of a problem or fault: *the helicopter was forced to abort its mission due to a blizzard.*
– ORIGIN Latin *aboriri* 'miscarry'.

abortifacient /uh-bor-ti-**fay**-shuhnt/ Medicine **adjective** (of a drug) causing an abortion. • **noun** a drug that causes an abortion.

abortion **noun** **1** a surgical operation in which a human pregnancy is deliberately brought to an end. **2** the natural ending of a pregnancy before the fetus is able to survive on its own.

electric shock noun a sudden discharge of electricity through a part of the body.

electrify verb (**electrifies**, **electrifying**, **electrified**) **1** pass an electric current through something. **2** convert a machine or system to the use of electrical power. **3** (as adj. **electrifying**) very exciting or impressive: *an electrifying performance.*
– DERIVATIVES **electrification** noun.

electrocardiography /i-lek-troh-kah-di-**og**-ruh-fi/ noun the measurement and recording of activity in the heart using electrodes placed on the skin.
– DERIVATIVES **electrocardiogram** noun **electrocardiograph** noun **electrocardiographic** adjective.

electroconvulsive adjective relating to the treatment of mental illness by applying electric shocks to the brain.

electrocute verb injure or kill someone by electric shock.
– DERIVATIVES **electrocution** noun.

electrode /i-**lek**-trohd/ noun a conductor through which electricity enters or leaves something.
– ORIGIN from **ELECTRIC** + Greek *hodos* 'way'.

electrodynamics plural noun (usu. treated as sing.) the branch of mechanics concerned with the interaction of electric currents with magnetic or electric fields.
– DERIVATIVES **electrodynamic** adjective.

electroencephalography /i-lek-troh-in-sef-uh-**log**-ruh-fi/ **noun** the measurement and recording of electrical activity in the brain.
– DERIVATIVES **electroencephalogram** noun **electroencephalograph** noun.

electrolysis /i-lek-**trol**-i-siss/ **noun 1** chemical decomposition produced by passing an electric current through a conducting liquid. **2** the removal of hair roots or blemishes on the skin by means of an electric current.
– DERIVATIVES **electrolytic** /i-lek-truh-**lit**-ik/ adjective.

electrolyte /i-**lek**-truh-lyt/ **noun** a liquid or gel which contains ions and can be decomposed by electrolysis, e.g. that present in a battery.
– ORIGIN from Greek *lutos* 'released'.

electromagnet **noun** a metal core made into a magnet by the passage of electric current through a surrounding coil.

electromagnetic **adjective** relating to the interrelation of electric currents or fields and magnetic fields.
– DERIVATIVES **electromagnetically** adverb **electromagnetism** noun.

electromagnetic radiation **noun** a kind of radiation including visible light, radio waves, gamma rays, and X-rays, in which electric and magnetic fields vary simultaneously.

electromotive /i-lek-truh-**moh**-tiv/ **adjective** tending to produce an electric current.

electromotive force **noun** a difference in potential that tends to give rise to an electric current.

electron **noun** Physics a stable negatively charged subatomic particle found in all atoms and acting as the primary carrier of electricity in solids.

electronic **adjective 1** having components such as microchips and transistors that control and direct electric currents. **2** relating to electrons or electronics. **3** relating to or carried out by means of a computer or other electronic device: *electronic shopping.*
– DERIVATIVES **electronically** adverb.

electronica **noun** a style of popular electronic music deriving from techno and rave.

electronic publishing **noun** the issuing of books, journals, etc. as electronic files rather than on paper.

electronics **plural noun 1** (usu. treated as sing.) the branch of physics and technology concerned with the design of circuits using transistors and microchips, and with the behaviour and movement of electrons. **2** (treated as pl.) circuits or devices using transistors, microchips, etc.

electron microscope **noun** a microscope with high magnification and resolution, employing electron beams in place of light.

electrophoresis /i-lek-troh-fuh-**ree**-sis/ **noun** the movement of charged particles in a fluid or gel under the influence of an electric field.
– DERIVATIVES **electrophoretic** adjective.
– ORIGIN from Greek *phorēsis* 'being carried'.

electroplate /i-lek-troh-playt/ **verb** coat a metal object with another metal using electrolysis. • **noun** electroplated articles.

electroscope **noun** an instrument for detecting and measuring electric charge.

electroshock **adjective** another term for **ELECTROCONVULSIVE**.

electrostatic **adjective** relating to stationary electric charges or fields as opposed to electric currents.
– DERIVATIVES **electrostatically** adverb **electrostatics** plural noun.

electrosurgery **noun** surgery using a high-frequency electric current to cut tissue.
– DERIVATIVES **electrosurgical** adjective.

electrotherapy **noun** the use of electric currents passed through the body to treat paralysis and other disorders.

electrum /i-**lek**-truhm/ **noun** an alloy of gold with at least 20 per cent of silver, used for jewellery.
– ORIGIN Greek *ēlektron* 'amber, electrum'.

elegant **adjective 1** graceful and stylish. **2** pleasingly clever but simple.
– DERIVATIVES **elegance** noun **elegantly** adverb.
– ORIGIN Latin *elegans* 'discriminating'.

elegiac /el-i-**jy**-uhk/ **adjective 1** relating to or characteristic of an elegy. **2** sad; mournful: *the elegiac, bittersweet tone of the narrator's voice.*
– DERIVATIVES **elegiacally** adverb.
